

JavaScript – Strings

Practice Problems

Q. Answer the following questions. Also, explain why do you think that your answer is correct.

1. `console.log('JavaScript is Cool')` Syntax error, strings must open and close with the same character
2. `console.log('I'm gonna learn JavaScript')` Syntax error, the string closes on 'I' and the rest is out of it
3. `console.log("This is a \"test\" string")` Returns "This is a "test" string" since the \ validates the chars
4. `console.log('This is another /'test/' string')` Syntax error, / is not the same as \ and has no functionality
5. `console.log("How about this string??")` Displays correctly
