

JavaScript - Numbers

Practice Problems

Q. Answer the following questions. Also, explain why do you think that your answer is correct.

1. `console.log(0 / 0)` NaN, can't divide by 0
2. `console.log(0 / 5)` number, 0, since any number divided by 0 returns 0
3. `console.log(3 * 'a')` NaN, can't multiply a number and a string
4. `console.log('a' * 3)` NaN, can't multiply a number and a string
5. `console.log('b' + 4)` String, 'b4' since it concatenates the number with the string
6. `console.log(4 + 'b')` String, '4b' since it concatenates the number with the string
7. `console.log(5 - 'c')` NaN, can't do a minus operation on a string and a number
8. `console.log('c' - 5)` NaN, can't do a minus operation on a string and a number
