JavaScript – Null and Undefined Values

Practice Problems

Q. Answer the following questions. Also, explain why do you think that your answer is correct.

```
var mNum;
console.log(mNum)
var mNum = null
console.log(mNum)
```

1. What will be the result of the first and second console.log() ?

undefined and null

```
console.log(undefined == null)
console.log(undefined === null)
```

2. What will be the result of the first and second console.log() ?
true and false
